PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/062,112	<b>Applicant(s)</b> ADAMS, CURTIS E.	
	<b>Examiner</b> Callie E. Shosho	<b>Art Unit</b> 1714	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 13 June 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 3,5-7,9,11-13,15-19,23-25,29,33 and 49 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 33 and 49 is/are allowed.
- 6) ☒ Claim(s) 3,5-7,9,11-13,15-17,23-25 and 29 is/are rejected.
- 7) ☒ Claim(s) 18 and 19 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

1. All outstanding objections and rejections except for those described below are overcome by applicant's amendment filed 6/13/07.

**Claim Rejections - 35 USC § 103**

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 3, 5-7, 9, 11-13, 15-17, 23-25, and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhu et al. (U.S. 6,251,175) in view of either Belmont et al. (U.S. 5,713,988) or Johnson et al. (U.S. 6,478,863).

The rejection is adequately set forth in paragraph 8 of the office action mailed 12/14/06 and is incorporated here by reference.

**Response to Arguments**

4. Applicant's arguments filed 6/13/07 have been fully considered but they are not persuasive.

Specifically, applicant argues that in order to arrive at the present invention one would have to choose pigment, which is a non-preferred embodiment of Zhu et al. and only generically disclosed, choose presently claimed polymer from many types of polymer disclosed by Zhu, and choose presently claimed salt from many types of conductivity agents disclosed by Zhu et al.

However, while it is agreed that one must choose pigment, presently claimed polymer, and presently claimed salt from Zhu et al. to arrive at the present invention, the fact remains that Zhu et al. explicitly discloses ink comprising pigment, polymer having anionic functional group such as styrene-acrylic acid or polyacrylic acid, and salt having polyvalent metal cation such as calcium chloride. Further, the choice of each of the pigment and salt is not from amongst vast number of choices but from amongst group of 2, i.e. dye or pigment, and 11, respectively. While it is agreed that pigment is not the preferred colorant, it is noted that “nonpreferred disclosures can be used. A nonpreferred portion of a reference disclosure is just as significant as the preferred portion in assessing the patentability of claims”, *In re Nehrenberg*, 280 F.2d 161, 126 USPQ 383 (CCPA 1960). Further, it is significant to note that acrylic resin such as styrene--acrylic acid is one of the preferred binders disclosed by Zhu et al.

Applicant also argues that choosing the presently claimed components from Zhu et al. would go against the teaching of Zhu et al. that states that the ink must meet certain rigid requirements relating to viscosity, resistivity, solubility, compatibility of components, and wettability of substrate. Specifically, applicants argue that the replacement of Zhu et al.'s generic pigment for a modified pigment is not straightforward.

However, it is the examiner's position that the combination of Zhu et al. with Belmont et al. or Johnson et al. is proper.

Specifically, Belmont et al., which is drawn to non-aqueous ink jet ink as is Zhu et al., disclose the use of modified pigment such as carbon black having attached aromatic group containing amine functional group such as carboxyl group in order to produce ink with improved

jettness while Johnson et al., which is also drawn to non-aqueous ink jet ink, disclose the use of modified pigment comprising carbon black or organic pigment having attached anionic functional group such as carboxyl group. Thus, given that Zhu et al. is open to the inclusion of any pigment, given that Belmont et al. and Johnson et al. are each drawn to non-aqueous ink jet ink as is Zhu et al., and given that Belmont et al. and Johnson et al. each provide motivation for using the modified pigment as the pigment in Zhu et al., it is the examiner's position that the combination of Zhu et al. with Belmont et al. or Johnson et al. is proper.

Applicant also argues that Zhu et al. state that its essential that the ink jet ink have viscosity of from about 1.0 to about 10 cPs in order to achieve the disclosed rheological characteristics and thus, one skilled in the art would avoid combination of components that would undesirably rise the viscosity such as the use of salt with polyvalent metal cation, modified pigment, and additive binder comprising anionic group which may result in the flocculation of the pigment.

However, while applicant argues that flocculation "may" occur or that the combination of such components "may" cause undesirable rise in viscosity, there is no evidence to support that such events would occur when combining Zhu et al. with Belmont et al. or Johnson et al. Further, given the disclosure in Zhu et al. regarding the desired viscosity, it would have been obvious to one of ordinary skill in the art to control the viscosity of the ink to such values.

Given that Zhu et al. explicitly disclose the use of pigment, polymer such as styrene-acrylic acid, and salt such as calcium chloride with no disclosure that any combination of elements cannot be used together, given that Zhu et al. disclose the use of "any" pigment, and

given that Belmont et al. and Johnson et al. each provide motivation to utilize pigment having anionic group in ink jet inks, and absent evidence to the contrary, it is the examiner's position that there is a reasonable expectation of success when combining Zhu et al. with Belmont et al. or Johnson et al.

**Allowable Subject Matter**

5. Claims 33 and 49 are allowable over the "closest" prior art Zhu et al. (U.S. 6,251,175), Belmont et al. (U.S. 5,713,988), or Johnson et al. (U.S. 6,478,863) given that there is no disclosure in Zhu et al., Belmont et al., or Johnson et al. of ink comprising modified pigment having attached cationic group, at least one salt having a polyvalent anion, and polymer comprising cationic functional group wherein the cationic functional group of each of the pigment and polymer are capable of coordinating with the polyvalent anion.

6. Claims 18-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 18-19 would be allowable if rewritten in independent form as described above given that while the "closest" prior art Zhu et al. (U.S. 6,251,175) disclose use of ammonium, alkali, or alkaline earth metal salts, there is no disclosure or suggestion of salt wherein the polyvalent ion is  $\text{Zn}^{+2}$  or  $\text{Zr}^{+4}$ .

**Conclusion**

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

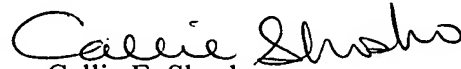

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Callie E. Shosho whose telephone number is 571-272-1123. The examiner can normally be reached on Monday-Friday (6:30-4:00) Alternate Fridays Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
